CS-471 Course Project Status Report

Deadline: Nov. 12th (end of day)

Requirement: Submit a concise report (maximum 5 pages) summarizing the progress since your proposal submission. Your status report should cover the following aspects:

- A brief response to your proposal feedback
- Update on problem definition:
  - Has the problem you want to solve changed?
  - Has the motivation for solving this problem changed?
- Update on design space:
  - Have you discovered additional dimensions within the design space?
  - Have you found any new related work targeting a similar problem?
- Update on questions, hypotheses, and tests:
  - What is the current status of your research questions? For each question, indicate whether it is *tested*, *planned*, *stuck*, *no longer relevant*, or *discarded*.
  - Have any new questions arisen that you believe are important and urgent during your exploration?
  - For each question, is there a new hypothesis? What insight does it provide?
  - For each test, what is the detailed methodology you will use to conduct the experiment?
- Update on results, progress, and milestones (if applicable; may vary based on your topic). The following are examples of information to include for specific project categories:
  - Metric Modeling: Include your model, analysis steps, experimental validation results, and error analysis.
  - Solution Proposal: Provide test results supporting your design decisions.
  - Result Reproduction: Include experimental findings and comparisons with previous studies.
  - Workload Characterization: Include measurements of relevant metrics.
- Challenges:
  - Describe any difficulties encountered, whether in experimentation, data gathering, or literature review.
  - Outline any assistance you need for your project.
- Update on your plan:
  - Changes in team composition (e.g., team member adjustments).
  - Reprioritization of questions, hypotheses, and tests.
  - Adjustments to the milestone schedule (relative to the initial proposal).
  - Updates to the final goal (relative to the initial proposal).

Feel free to include any additional information to comprehensively convey your progress and challenges.

You can find a sample status report from the last year on the course website.

Send the status report to cs471-2026-instructors@groupes.epfl.ch with the subject line: "[CS-471] Course Project Status Report - {Team Name}". For example, if your team's name is *PARSA*, the subject line should be: "[CS-471] Course Project Status Report - PARSA".
